EDUCATION

University of Michigan, Ann Arbor

Expected Graduation: **May 2027**

Master of Science in Computer Science and Engineering | GPA: **4.0**

Relevant Coursework: Software Engineering, Scalable Systems, Information Retrieval, Natural Language Processing

University of Illinois (UIC)

May 2025

Bachelor of Science in Computer Science | GPA: **4.0** | Honors: **Summa Cum Laude, Dean's List**

Professional Affiliations: [Stanford TreeHacks 2025 Winner](#) | Tapia Scholarship Recipient | Google exploreCSR

SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL, C/C++, Java, HTML

Frameworks: MCP, gRPC, FastAPI, React, Node, Express, Flask, SQLite, Git, Figma, AWS, PyTorch, LangChain, Claude SDK

RELEVANT EXPERIENCE

DoorDash | *Software Engineering Intern, San Francisco CA*

May 2026 - Aug 2026

- Cut a **20 minute on-call investigation to 30 seconds** (~40× faster) by building Courier Session Inspector, an async MCP server that gives AI agents a single-query interface and auto-flags data mismatches.
- Integrated **8 backend services** (gRPC + Cassandra) with a parity engine, and extended it with an autonomous LLM Anomaly Watcher that routinely scans **500,000+ dash logs** and posts alerts on Slack.
- Deployed a production Kubernetes service used by **8 on-call engineers** from Claude Code; the bot caught 4 real production bugs on its live runs.

University of Michigan | *Project Lead & Graduate Student Instructor, Ann Arbor MI*

Jan 2026 - Present

- Managed the end-to-end release cycle for Intro to Data Structures course, delivering GitHub-based programming project releases while maintaining autograder workflows for **800+ students**.
- Led **15 weekly office hours**, mentoring students in debugging modern C++ and problem solving.

GigXR | *Software Engineering Intern, Ann Arbor MI*

Jan 2026 - May 2026

- Developed a Conversational AI evaluation dashboard for medical instructors that benchmarked **6 frontier LLMs** on **50 doctor-AI patient transcripts** through a LangChain and Python Flask backend.
- Reduced manual review of medical student interviews **to 5 minutes** by creating an AI evaluation rubric validated by Michigan Medicine.

CNA Insurance | *Software Engineering Intern, Chicago IL*

June 2024 - Aug 2024

- Enhanced user experience for **43,000+ insurance agencies** by migrating legacy jQuery-based components to React.js for the CNA Surety Portal (onlinepay.cnasurety.com) improving maintainability.
- Reduced cancellation processing time from **1 week to 2 minutes** by automating requests with SOAP APIs.

INDEPENDENT PROJECTS

SurviveX (Stanford TreeHacks Winner) | *ExecuTorch, Llama 3.2-1B, Python*

- Deployed a real-time [Embedded AI survival assistant](#) on Apple Vision Pro using Llama 3.2-1B model, running on-device with ExecuTorch; won Most Creative On-Device AI Deployment out of **1000 participants**.
- Fine-tuned Llama using TorchTune through NVIDIA Brev on survival scenarios to improve contextual accuracy.

Chat R3wind | *React, TypeScript, Astro, Node, Recharts*

- Built an in-browser analytics app ([r3wind.chat](#)) adopted by **50 users** that generates Spotify Wrapped-style summaries of WhatsApp chat archives averaging **10,000 messages** while preserving **100% data privacy**.
- Designed interactive chat insights (top texters, response time, emojis, streaks) to help users reflect on their WhatsApp habits - all rendered using TypeScript and Recharts.

Skindex | *Python, BM25, BeautifulSoup*

- Built a multi-index search engine for **6,000+ skincare products** by scraping, indexing, and ranking product and ingredient data with a custom BM25F retrieval pipeline, outperforming standard BM25.

LEADERSHIP & EXTRACURRICULARS

Stanford Code in Place | *Section Leader*

May 2026 - June 2026

- Led a global online cohort of **15 students**, developing Python lessons, facilitating labs, and supporting debugging discussions across **7 time zones**.
